P R E F A C E.

THIS highly valuable sale of coins is comprised of two interesting English collections. The first portion consisting of Greek, Roman and English coins, the property of a gentleman formerly an officer in the army, who does not desire his name to transpire, and described in the lots from Nos. 1 to 630, contains many unusually fine and rare pieces, particularly the beautiful Syracuse medallion, No. 15; the Arsinoe octadrachm, No. 69; the extremely rare Stater of Diodotus, No. 65; several very fine Roman aurei; the complete series of four pieces of Anglo-Gallic gold of Edward III. and the Black Prince, Nos. 143 to 7; the excessively rare groat of 1494, No. 163, never before offered in this country; a rare shilling of Henry VIII., No. 168; half-sovereign of Edward III., No. 172; the splendid series of coins of Elizabeth, in gold and silver; the James I. fine sovereign; the extremely rare siege pieces of Pontefract of Charles II.; the Oliver Cromwell set of silver; the rare crown of William IV., and the extremely rare portrait testoon of Mary, Queen of Scots, which is another piece that has never before appeared in an American auction sale, and the splendid series of war medals and decorations, perhaps the largest that has ever been offered in this country. In this series the rare medal for the War of 1812 and for Northwest Canada, 1885, described in the Canadian series may also be included.

The second portion is the collection of Mr. E. J. M. Chaloner, beginning with lot 630 and is comprised of coins of the United States and Canada, among which are many rare pieces of great interest, particularly the N. E. shilling; the set of silver coins of Lord Baltimore; the Rosa Americana series containing the excessively rare two-pence of 1724, only one other known, and the very fine quarter dollar of 1796, and finally a fine collection of Canadian coins and medals, the chief point of merit in which is the perhaps finest series in

existence of the Canadian Bank Tokens of 1838 to 1839, to which we have given special study and have described them at full length with great exactness, so that with the aid of the plate which gives all the dies, collectors will be able to discern the varieties, and will find the catalogue to be in the future a valuable reference for this series, as neither of the works on the subject, Le Roux or Breton, have given it the critical study or description, or illustration with a photographic plate, which it demands.

The splendid series of Jewish shekels and half shekels of Simon Maccabeus, Nos. 55 to 62, and the coins of Vespasianus referring to Judea, Nos. 89 to 93, are also the property of Mr. Chaloner, but we have placed them in their proper order in the series of Greek and Roman coins of the first portion.

These collections have been placed in our hands for absolute sale without any reserve, except in the few lots upon which the limits are printed in the catalogue. We refused to accept the sale with limits, and the owners then only placed limits on the few lots mentioned, for the sale of which they were fearful in this, to them, untried market, and on these 10 per cent. commission is to be paid; and our patrons will therefore see that the sale is thoroughly *bona fide*, and this penalty will be incurred upon all lots bought in.

Many of the pieces of highest rarity are not limited.

On account of some limits being placed, we feel it due to the owners to declare that the collections do not belong to us, nor have we placed nor do we own a single piece in the sale.

In our opinion the limits are all reasonable and the coins worth more—in fact the owners put them below cost endeavoring to allow a margin that would insure sale. The average rarity and value of the coins in the sale is unusually high.

Catalogues, with five autotype plates, price \$1, will be issued, and priced copies of the catalogues without plates will be supplied after the sale for 50 cents. We guarantee all the coins and medals genuine and original unless otherwise described.

BANK OF MONTREAL.

- 851 The extraordinary collection of the tokens issued by this bank during the years 1837, 8, 9, described below, are the result of thirty years' special study and research, and as

the collector does not wish them separated, they will be sold in one lot, upon which he has placed a limit of \$500; and this is a reasonable price, for there are varieties in the set previously unknown or unpublished. It is the most extensive collection of these excessively rare coins of 1338-39 ever offered, and, judging by its containing pieces not described or mentioned by Le Roux or Breton, and as far as we are aware, is the most complete set in existence. We have carefully compared the coins, rearranged them from Mr. Chaloner's arrangement, and recatalogued them, and will guarantee the varieties to be as described. All the dies are represented on Plate V.
